I oppose SB 1110, 1115, 1116, 1117, & 1118.

I underwent surgery for a reversal of a temporary colostomy on December 5, 2002. After this surgery, my doctor negligently and carelessly insisted that I undergo another procedure on December 13, 2002, to remove a bowel obstruction when, in fact, clinical and radiologic evidence was to the contrary. During the surgery, my doctor removed an excessive amount of my bowel, and my doctor did not properly conduct the re-attachment procedure, thus rendering me with a condition that has been debilitating and has caused me a lot of mental anguish. I now live everyday with a constant reminder my doctor's negligence as I go through life with a colostomy bag permanently affixed to my body and will continue to live this way for the rest of my life.
